

Attorney-at-law with 12+ years of experience in corporate law, compliance and EU innovation programmes, with a practical, safe approach to using AI in legal work. In my work, I have supported both hundreds of science and technology startups through Horizon Europe and major international corporations, helping translate legal requirements into practical business solutions through risk analysis, internal policies, and corporate documentation. Years of practice and personality profiling point in the same direction: it's in people-centred, collaborative environments that I work most effectively.
