

Attorney-at-law with 12+ years of experience in corporate law, compliance and EU innovation programmes, with a practical, safe approach to using AI in legal work. I specialise in Horizon Europe legal support, legal operations and corporate governance & compliance - ensuring companies' day-to-day operations stay aligned with the law, from contracts and internal policies to risk management. I'm now expanding this expertise toward the intersection of law and AI, exploring how AI-adoption training, policy design and workflow automation can make legal operations faster and safer.
